Garmin Nuvi 2557LMT Disassembly

This guide will show how to get to the internal components of the device.

Written By: Danis Terzi

INTRODUCTION

The needed tools are a T5 Torx Screwdriver and a plastic opening tool. In order to get to the inside of the device the nameplate and the back of the device will be taken off.

TOOLS:

- T5 Torx Screwdriver (1)
- iFixit Opening Tools (1)

Step 1 — Garmin Nuvi 2557LMT Disassembly

- Using a T5 Torx screwdriver, remove four 6 mm screws from the four corners of the back of the device.

Step 2

- Grip the device with your hands. Using your thumbs pull the nameplate towards yourself and off the device.

Step 3

- There is a visible separation between the front and the back of the device.
- Using a plastic opening tool, pry open the device along this separation.
- Trying to open the device on the opposite side will rip the motherboard-display connector.

Step 4

- Carefully pull apart the device by opening it up on the opposite side of the nameplate.

To reassemble your device, follow these instructions in reverse order.
